## LC5550 V2.2

### Silent Series

The SILENT SERIES by LC-POWER offers a good price-performance ratio: thanks to its 120mm fan, the LC5550 V2.2 lets you experience a stress-free and silent work in your office as well as at home. Despite the low sound level, the power supply offers a good cooling capacity for your system thanks to its ventilation grille on its back.

The power supply features all current connectors of the office and mid-range sector. Besides current mainboards you can connect several SATA and PATA hard disk drives respectively optical drives. A graphic card can be added due to the PCI-Express connector.

The state-of-the-art energy saving technology decreases the power consumption in standby mode (0,4W) and increases the efficiency of the power supply up to 87%!

Including Active PFC (power factor correction for an efficient use of the spent energy) and all relevant safety circuitry.
